Re: Clean Sites' Superfund Community-Industry Forum-West, March 7, 1991

Dear Ms. Pirzadeh,

I would like to take this opportunity to tell you I wish we could have had time to visit at the Forum in Los Angeles. Whenever there was a break we were both busy with someone else.

I found the Forum very interesting and heard a lot of comments regarding communication problems that were quite enlightening. I think the Colbert area is very fortunate to have had such a good working relationship with EPA all of these years. That relationship has been especially helpful to us this past year.

I read through the various EPA proposals that Clean Sites sent to us and hope to see most of them put to use. I see that Region X already is practicing some of them.

Again, I am sorry we didn't get a chance to meet at the Forum and hope the opportunity will arise in the near future.

Sincerely,
